

Spamassassin/Spam Filters

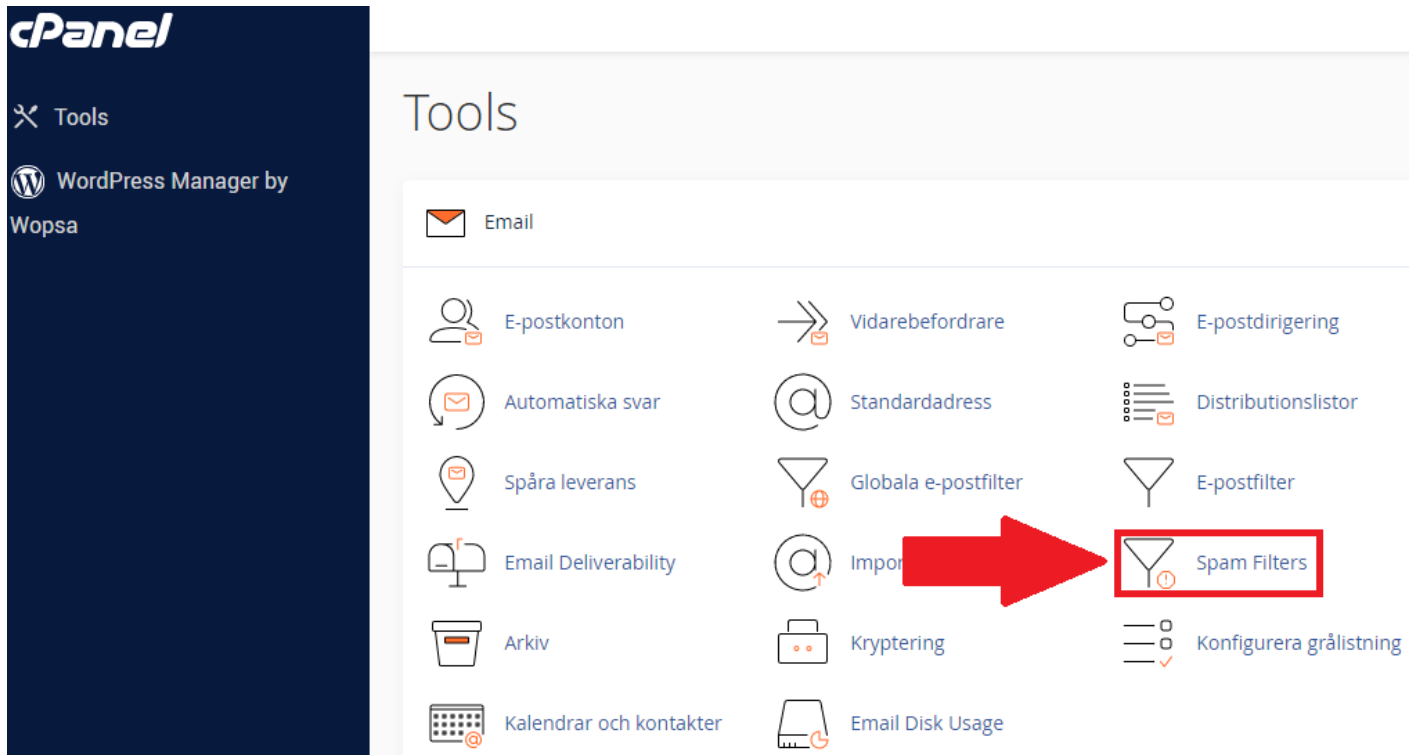

Vad är spamassassin/Spam filters?

Spamassassin/Spam filters är en funktion som filtrerar och tar bort spam. Du kan slå på det och justera det just efter hur du vill ha det.

Hur slår jag på det eller justerar inställningarna?

Först måste du logga in på cPanel, guide till det finns [HÄR](#).

Där inne klickar du på "**Spam Filters**" under fliken "Email".

Där inne kan du slå på/stänga av spamassassin/spam filters.

Spam Filters

Manage the settings for the spam filters (powered by Apache SpamAssassin™) for your email accounts. Identify unsolicited bulk email, (Spam Box) or automatically delete it (Auto-Delete) from your email account. For more information, read the [Apache SpamAssassin](#) do

[Spam Filters](#) / [Overview](#)

☒ Process New Emails and Mark them as Spam:

Apache SpamAssassin is **enabled**. This will mark suspicious email messages as spam. The server will update the header of new messages whose calculated spam score meets or exceeds the [Spam Threshold Score](#) (5).

☐ Automatically Delete New Spam (Auto-Delete):

Auto-Delete is currently **disabled**. Enable this option to automatically delete spam messages. The Auto-Delete option permanently deletes new emails with a calculated spam score that meets or exceeds the Auto-Delete Threshold Score.

[Configure Auto-Delete Settings](#)

Additional Configurations (For Advanced Users):

Most users will not need to customize these settings.

[Show Additional Configurations](#) ▼

Då är det klart! Om "knappen" är blå och det står "Apache SpamAssassin is **enabled**." så är den aktiverad.

Du kan även slå på "Automatically Delete New Spam (Auto-Delete)" det betyder att mailen raderas direkt istället för att du ska behöva hantera det alls.

Det går också att "whitelista" (alltid acceptera) eller "blacklista" (aldrig acceptera) från e-poster du själv kan välja genom att klicka på "**Show Additional Configurations**"

The screenshot shows the cPanel interface. On the left is a dark blue sidebar with the cPanel logo and navigation links for 'Tools' and 'WordPress Manager by Wopsa'. The main content area is titled 'Spam Filters' and includes a description: 'Manage the settings for the spam filters (powered by Apache SpamAssassin) or automatically delete it (Auto-Delete) from your email.' Below this is a breadcrumb trail 'Spam Filters / Overview'. A toggle switch for 'Process New Emails and Mark the' is turned on, with text stating 'Apache SpamAssassin is **enabled**. This will mark suspicious email messages whose calculated spam score meets or exceeds the **Spam Threshold Score**.' Another toggle switch for 'Automatically Delete New Spam (Auto-Delete)' is turned off, with text stating 'Auto-Delete is currently **disabled**. Enable this option to automatically delete new emails with a calculated spam score that meets or exceeds the **Spam Threshold Score**.' Below this is a link 'Configure Auto-Delete Settings'. At the bottom, under 'Additional Configurations (For Advanced Users):', it says 'Most users will not need to customize these settings.' and a link 'Show Additional Configurations' with a dropdown arrow. A large red arrow points to this link.

Du kan även klicka "**Spam Threshold Score**" för att läsa på om det och ändra hur aggressiv och vilken grad du vill ha på din spam filter.

OBS! Vi rekommenderar att ni har den på "Default (5)" som den är inställd på automatisktnär ni slår på spamassassin. För att inte riskera att den filtrerar bort viktiga mail.

[Spam Filters](#) / Adjust Spam Threshold Score

Adjust Spam Threshold Score

Configure the Spam Score Threshold. If your hosting provider enables rewrites, the server will add a Spam Threshold Score.

Spam Threshold Score (required_score) ?

Spam messages score higher calculated spam scores than regular messages. If a message's calculated spam score meets or exceeds the Spam Threshold Score, the system will label that message as spam. For example, an account that uses a Spam Threshold Score of 10 will only mark messages that are obviously spam. A Spam Threshold Score of 2 will label many messages as spam, which includes messages that are likely **not** spam. We recommend that new users use the default setting of 5. We recommend that an [ISP](#) set this score to 8. The Spam Threshold Score does not affect the Auto-Delete Threshold Score.

Default (5) (Aktuellt)

Aggressive, Many False Positives (1)

Recommended for Well-Tested Servers (4)

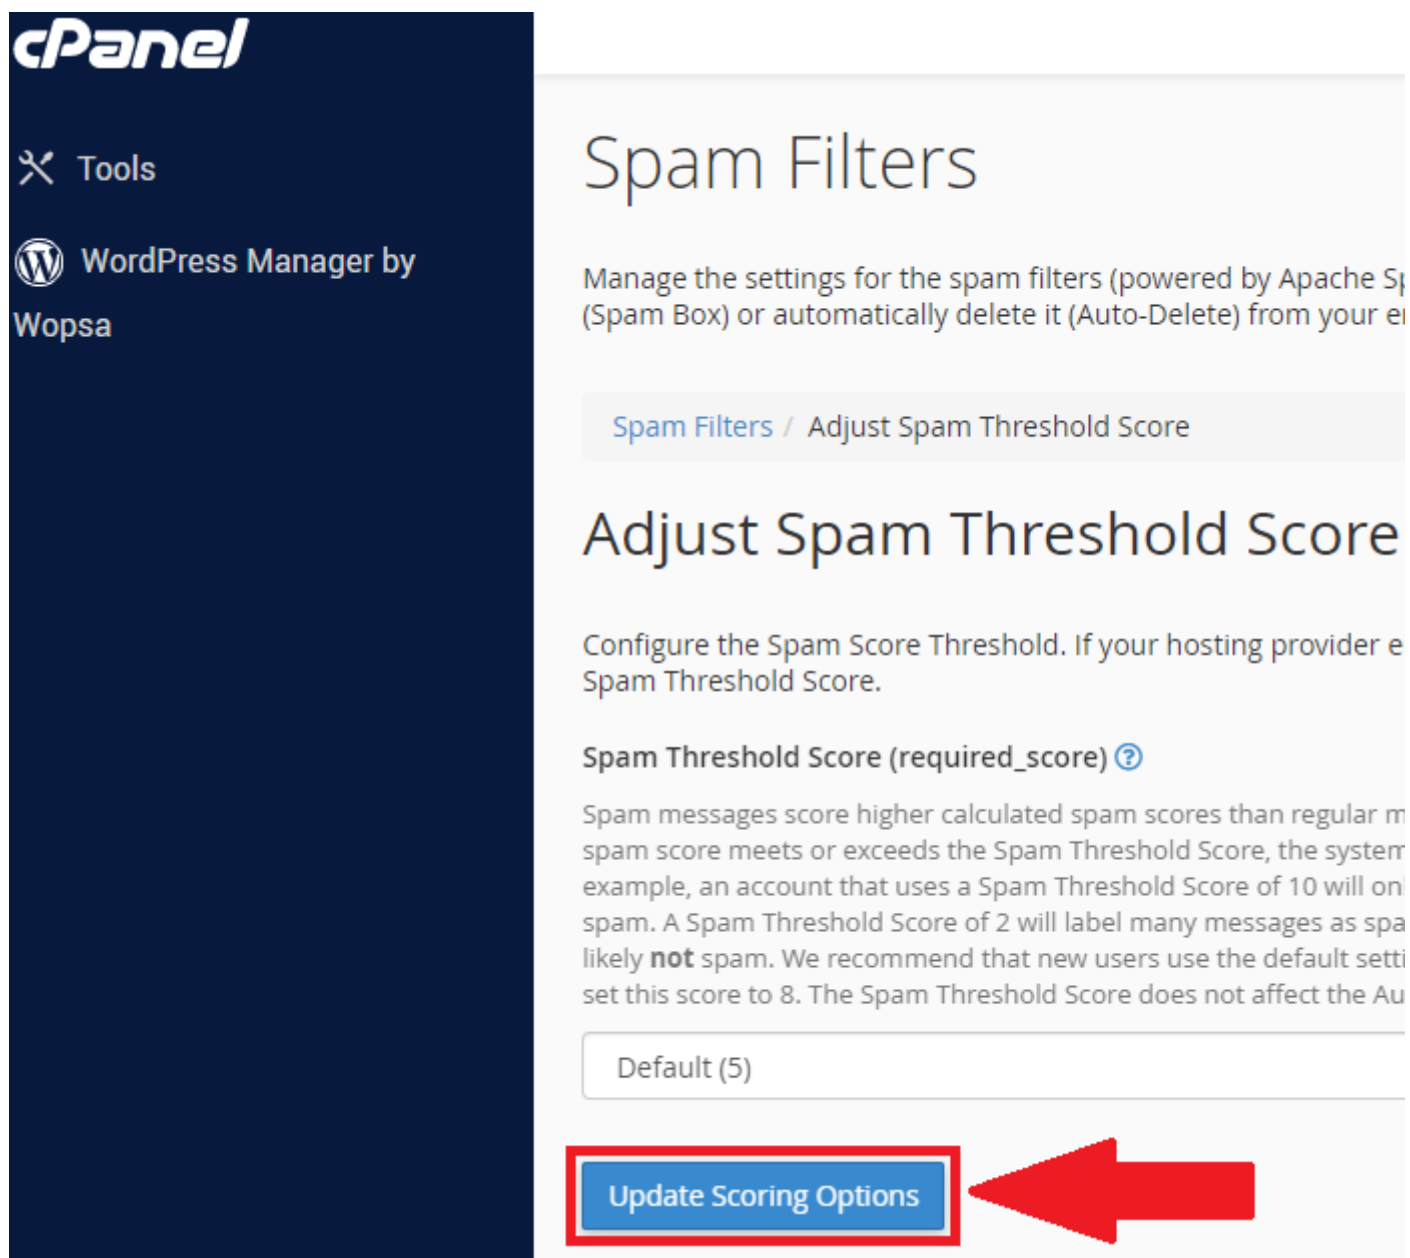

Default (5) (Aktuellt)

Recommended For Internet service providers (8)

Passive, Only Very Obvious Spam (10)

Anpassat

sedan trycker du på "**Update Scoring Options**" för att verkställa ändringen av grad.
